- The largest number of kidney transplant for ABO incompatible patients (141 Cases)
- The third largest number of microvascular decompression in Korea (4,429 Cases)
- 4,505 cases of Cerebral aneurysm (Clip/Coil)
- 16,500 cases of cardiovascular interventional procedure

Basic Health Screening Program

A program that provides the basic health screening to prevent and diagnose chronic diseases

- Questionnaires and counseling : medical consultation, health risk factor assessment
- Physical measurements : height, weight, pulse, blood pressure, abdominal circumference
- Body composition analysis : body fat, muscle mass, and obesity
- Blood tests : complete blood cell, blood type, hepatitis A, B, C, liver function, kidney function, uric acid, blood lipid, blood sugar(HbA1c, Glucose), inflammation(ESR), thyroid hormones, infection(syphilis, HIV)
- Tumor markers : liver cancer, colon cancer, pancreatic cancer, prostate cancer(men), ovarian cancer(women)
- Urinalysis : proteinuria, glucose, hematuria, urinary tract infection

• Stool tests : occult blood, parasites

• Eye exam : visual acuity, intraocular pressure

• Audiometry

• Pulmonary function tests

• Chest X-ray

• Electrocardiogram

• Esophagogastroduodenoscopy

• Upper abdominal ultrasound

• Dental examination

• Specialist's results consultation

• Female : mammogram, pap smear

*Payment for additional tests, such as biopsy, is on your own.

Bongseng

Male
450,000 KRW

Female
525,000 KRW

Not include sedation anesthesia

Lifecycle Program

Climacteric Program
A program for midlife and climacteric period

- All items of Bongseng program is added
- Bone mineral density test
- Additional Blood Tests : vitamin D
- Male : male hormones, prostate ultrasound, low-dose chest CT
- Female : female hormones, breast ultrasound, trans-vaginal ultrasound, human papillomavirus

Male
750,000 KRW

Female
900,000 KRW

Not include sedation anesthesia

*Payment of additional tests, such as biopsy, is on your own.

Youth
Programs for young people in their 20s, test takers, and international students

- Questionnaires and counseling : medical consultation, health risk factor assessment
- Physical measurements : height, weight, pulse, blood pressure, abdominal circumference
- Body composition analysis : body fat, muscle mass, and obesity
- Blood tests : complete blood cell, blood type, hepatitis A, B, C, liver function, kidney function, uric acid, blood lipid, diabetes, inflammation, thyroid hormones, infection(syphilis, HIV)
- Urinalysis : proteinuria, glucose, hematuria, urinary tract infection
- Stool tests : occult blood, parasites
- Eye exam : visual acuity, intraocular pressure
- Audiometry : Electrocardiogram
- Chest X-ray : Upper abdominal ultrasound
- Dental examination : Varicella antibodies
- Allergy test(Multiple Allergen Simultaneous Test)
- Specialist's results consultation
- Female : anemia workup, rubella antibody, pap smear

Youth

Male
375,000 KRW

Female
450,000 KRW

Cancer precision Program

Major Cancers
A program consisting of scrutiny to detect cancer in major organs early

- All items of Bongseng program is added
- Colonoscopy
- Low dose chest CT
- Abdominal CT(with contrast agent)
- Thyroid ultrasound
- Male : prostate ultrasound
- Female : breast ultrasound, trans-vaginal ultrasound, human papillomavirus

Male
1,200,000 KRW

Female
1,425,000 KRW

Not include sedation anesthesia

* Payment for additional tests, such as biopsy, is on your own.

Vascular Disease Program

Brain & Cerebrovascular disease Program
A program that consists of a series of tests to detect brain diseases such as stroke, cerebral aneurysm, and brain tumors.

- All items of Bongseng program is added
- Brain MRI & MRA
- Cerebral blood flow ultrasound
- Carotid ultrasound

Male
1,500,000 KRW

Female
1,575,000 KRW

Not include sedation anesthesia

* Payment for additional tests, such as biopsy, is on your own.

Heart & Cardiovascular disease Program
A program of screenings for early detection of heart disease, including angina, myocardial infarction, and heart failure.

- All items of Bongseng program is added
- Cardiac CT(with contrast agent)
- Echocardiogram

Male
975,000 KRW

Female
1,050,000 KRW

Not include sedation anesthesia

* Payment for additional tests, such as biopsy, is on your own.

Premium Program

VIP
Tests to detect cancers of major organs at an early stage, as well as programs to precisely diagnose cardiovascular and cerebrovascular disease.

*A two-day examination without hospitalization

- All items of Bongseng program is added
- Brain tests : Brain MRI & MRA
- Cardiac tests : cardiac CT(with contrast agent), Echocardiogram
- Lung screening : low dose chest CT
- Digestive examination : colonoscopy
- Thyroid ultrasound
- Bone mineral density test, lumbar spine X-ray
- Arteriosclerotic stenosis test
- Additional blood tests : pancreatic disease, rheumatoid factor, vitamin D, inflammation, homocysteine
- Male : prostate ultrasound
- Female : trans-vaginal ultrasound, breast ultrasound

VIP

Male
2,850,000 KRW

Female
3,000,000 KRW

Not include sedation anesthesia

*Payment for additional tests, such as biopsy, is on your own.

Additional Examination

Program	Category	Cost (KRW)
Brain	Brain MRI & MRA	680,000
	Brain MRI	460,000
	Brain MRA	380,000
Heart	Cerebral blood flow ultrasound, Carotid ultrasound	200,000
	Cardiac CT (with contrast agent)	230,000
	Echocardiogram	120,000
Digestive organs	Abdominal CT (with contrast agent)	200,000
	Esophagogastroduodenoscopy	110,000
	Colonoscopy	160,000
	*Endoscopy sleep management fee (stomach, colon each)	60,000
Chest	Low dose chest CT	160,000
Female	Breast ultrasound	110,000
	Trans-vaginal ultrasound	80,000
	Trans-vaginal ultrasound, Human papillomavirus	140,000
	Trans-vaginal ultrasound, Breast ultrasound	180,000
Tyroid	Thyroid ultrasound	80,000
Osteoporosis	Bone mineral density test (lumbar spine, hip joint)	100,000
Allergy	Multiple Allergen Simultaneous Test	150,000

※The cost will be added 50% of each amount

Program	Category	Cost (KRW)	
Blood Precision	NK cell activity test	70,000	
	Totalantioxidantstatus(TAS) Totaloxidantstatus(TOS) test	60,000	
Genetic Test (GenoPAC)	Common cancer type 3 I	Stomach, colon, and lung cancer	60,000
	3 types of male cancer II	Liver, thyroid, and prostate cancer	60,000
	6 types of male cancer	Stomach, colon, lung, liver, thyroid, and prostate cancer	70,000
	11 types of male cancer	6 types of male cancer + pancreatic, testicular, bladder, esophageal, and kidney cancers	100,000
	3 types of female cancer I	Stomach, colon, and breast cancer	60,000
	3 types of female cancer II	Endometrial, thyroid, and lung cancer	60,000
	3 types of female cancer V	Thyroid, breast, and cervical cancer	60,000
	7 types of female cancer	Stomach, colon, breast, endometrial, thyroid, lung, and ovarian cancers	70,000
	12 types of female cancer	7 types of female cancer + liver, pancreas, bladder, esophagus, and kidney cancer	100,000
	3 types of diseases	Parkinson's disease, alzheimer's disease, and stroke	60,000
5 types of diseases I	Parkinson's disease, alzheimer's disease, stroke, cerebral aneurysm, and type 2 diabetes	70,000	
5 types of diseases II	Osteoporosis, osteoarthritis, obesity, high blood pressure and migraines	70,000	
10 types of diseases	Parkinson's disease, alzheimer's disease, stroke, cerebral aneurysm, type 2 diabetes, osteoporosis, osteoarthritis, obesity, high blood pressure and migraines	100,000	
15 types of diseases	10 types of diseases + chronic obstructive pulmonary disease, myocardial infarction, atrial fibrillation, asthma and depression	140,000	
Men's all-around 26 types	15 types of diseases + stomach, colon, lung, liver, thyroid, prostate, pancreatic, testicular, bladder, esophageal, and kidney cancers	200,000	
Women's all-around 27 types	15 types of diseases + stomach, colon, breast, cervical, thyroid, lung, ovarian, liver, pancreas, bladder, esophagus, and kidney cancer	200,000
